IRAN

“A Tapestry of Timeless Wonders”

| NASIR-OL-MOLK MOSQUE (PINK MOSQUE), SHIRAZ

INTRODUCTION

Iran is a country in southwest Asian, country of mountains and deserts. Eastern Iran is dominated by a high plateau, with large salt flats and vast sand deserts. The plateau is surrounded by even higher mountains, including the Zagros to the west and the Elburz to the north. Its neighbors are Turkmenistan, Azerbaijan and Armenia on the north, Afghanistan and Pakistan on the east, and Turkey and Iraq on the west. Tehran is the capital, the country's largest city and the political, cultural, commercial and industrial center of the nation.

Iran holds an important position in international energy security and world economy as a result of its large reserves of petroleum and natural gas.

The history of Iran covers over four thousand years. Throughout history, it has been of great strategic importance because of its central location in Eurasia. Iran is significant in international politics due to its large supply of petroleum as well as its influence in the Middle East region.

COLLECTION OF IRANIAN CULTURE

HISTORY

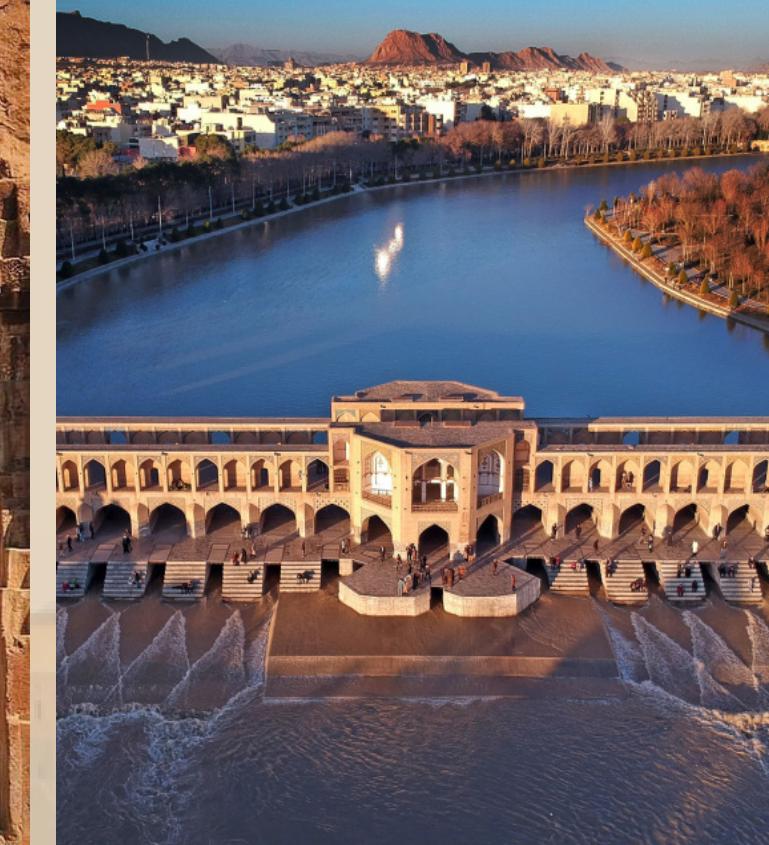

Linguistically, Iran means the land of Aryans, the Eastern branch of Indo-Europeans. A group of Aryans (or Indo-Iranians) who migrated to the Iranian plateau around 2000 BCE from Central Asia, are thought to be the direct ancestors of modern Iranians. This has encouraged many historians to start the history of Iran from the Aryan migrations or the establishment of the first Aryan political power, the Achaemenid Empire.

At the same time, it is true that long before the influx of Aryans into Iran, different peoples with established civilizations and kingdoms inhabited the country.

These dynasties that deteriorated before the arrival of the Aryans or were defeated by them had an extensive system of international trade and relations with other civilizations of their time, as far west as Egypt and maybe Southern Europe and to China in the east.
